HABITUAL ORIMINALS. To the Editor of the " Pall Mall Gasette."

Sir. - Lust week a theory respecting the origin of oriminals was propounded by a Mr. Hastings at the Social Science gathering in Glasgow. It is a very good specimen of the sort of thing that takes at such gatherings. Mr. Hostings stated that, having taken note of the criminals passing through Worcester Gaol for the space of five years, he finds their average height to he sixty-four inches, and their average weight 128 th. This is below the average height and weight of Englishmen. Mr. Heatings therefore concludes that all oriminals are beneath the average strength of man in their respective countries, and that they take to crime chiefly because they are elbowed out of honest employment by stronger rivals, and have no means of subsisting except by orime. Now there may be some truth in this theory so far as the county of Wordester is concerned. That county is agriculturul and among peasants the chief essential is physical strangth. No farmer will employ an exceptionally weak labourer; and the man thus rejected must choose between beggary and orime. But it is manifestly absurd to apply observations made in Worcester Gaol to whole of England, for many reasons. To begin with, there is the question of race. The men of Worcester are not framed like the men of Lancasbire: the men of Cumberland differfrom both; the men of Yorkshire differ from all three; and so do the men of Cornwall and Devon. Here the persent is thickest and henvy, there towering and loose-limbed; in one place, as in Westmoreland, he is a model of symmetry, in another he is light and sinewy. He who would be undersized in Lancashire and under weight in Yorkshire may be a fair specimen of his class in Worcestershire. But it is only among peasants and among the ruder craftsmen of towns that physical strength is the chief thing required. In the better paid trades skill is the essential. It does not appear to me true, then, that more lack of bodily strength is a main cause of orime, or that generally speaking, oriminals are men who have been elbowed out of honest employment by more muscalar competitors. The very contrary, I think, will be found the fact. It certainly was so all over the earth in primitive days; and it is so still, wherever primitive habite prevail. Crime-here I speak of habitual crime-is not the result could and never can make a anccessful driwould render the criminal a man of mark in honest ways. Orime is a state of endless war -war, too, of the most daring kind, the war of The inun lifted his whip, as if to strike one against many. ENGLISH AND CHINESE DICTIONARY WITH THE PUNTI AND MANDARIN <del>PRONUNCIATION.</del>

An Anglo-Chinese Dictionary, published

at the Daily Press Office, Hongkong.

HOR comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them are here given in extenso. Each and every word is fully illustrated and explained, forming evercises for students of a most instructive nature. Both the Court and Punti pronunciations are given, the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications. Containing the names of all the Articles of To illustrate the vast scope of the work, the Trade, objects of Natural History, Furniture, would take some light Cargo at a Cheap following facts are submitted for consideration. &c., &c., with the Punti, and Mandarin Fromm.
